

Summers Summer School

Summer School @ Meredith

CS 156: Website Design and Management: You use websites every day; why not learn how to create one of your own! This course offers an introduction to HTML that will give you new insight into what goes into creating and managing a website. Take advantage of the opportunity to learn these exciting and marketable skills online this summer and you will be able to use them throughout your college career and beyond! Course fulfills the Natural Science/Math/CS elective requirement of the general education program in addition to satisfying requirements for a number of majors/minors. (3 credits, first six-week summer session, online -- reliable high speed internet connection required). Taught by Kristin Watkins. Email for more information: WatkinsK@meredith.edu.
