

Campus Clear App Now Available for Students

As previously announced, Meredith College will be using the [Campus Clear app](#) to facilitate daily self-monitoring for Covid-19 symptoms. This free app, which provides a short, intuitive survey that takes less than 10 seconds to complete on a daily basis, will be an important part of Meredith's efforts to prevent the spread of COVID-19.

After a successful roll-out with employees and a pilot group of students, Campus Clear is now available for students to use. Students are asked to download the Campus Clear app, which is available for free in the [Apple store](#) and on [Google Play](#), and to use their Meredith email address to create an account.

Any student who lives on campus or who plans to come to campus at any point this semester should log into Campus Clear daily to answer a question about their symptoms. Commuting students and employees will need to show their Campus Clear "Good to Go" screen to Campus Police at the Hillsborough Street gatehouse. Please practice patience and allow some additional time to enter campus.

Campus Clear Web Interface Available

For employees and students without a compatible smartphone, Campus Clear is now available via a web interface. This version can also be used by campus visitors. Visit <https://web.ivy.ai/app/campusclear> to access the web version of Campus Clear. If computer access is not available, please contact Human Resources.

Please note that the privacy of each Campus Clear user is protected and their information is only accessible to key health officials of the College who are leading contact tracing efforts.
