

Meredith community,

We have just been notified that three commuter students have tested positive for Covid-19. These students were last on campus on Monday, August 17.

Contact tracing is underway to notify those who meet the CDC's [close contact](#) guidelines. If you are contacted by a member of the Meredith College contact tracing team, please answer all questions to assist in the contact tracing effort and help control the virus in our community.

When a member of the Meredith community tests positive for Covid-19 and has been on campus during the incubation period, contact tracing immediately begins. Affected campus spaces are deep cleaned according to CDC protocols and in some cases classes may be temporarily moved. Appropriate cleaning has been initiated for these unrelated cases.

Under FERPA and HIPAA privacy regulations, Meredith College is unable to provide additional details about student cases. Active and cumulative cases at Meredith are reported on Meredith's [Covid-19 notifications page](#).
